Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE *three* MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on *Jul 8, 2002* .

2a) ☒ This action is **FINAL.** 2b) ☐ This action is non-final.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

> The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6, 11-14, and 20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant does not teach what is encompassed by "thermized".

Applicant's arguments filed July 8, 2002 have been fully considered but they are not persuasive.

Applicant argues that the specification at page 7, lines 8-10 teaches that "thermized" is meant to mean pasteurization or sterilization. Nowhere in the specification does Applicant teach pasteurization or sterilization. Nor does the specification provide times and temperatures that would support pasteurization or sterilization.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless --
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kamaly et al, Duitschaever et al, Kwak et al, or Saita et al (EP 0346884) for the reasons set forth in rejecting the claims in the last Office action (Paper No. 7).

Kamaly et al, Duitschaever et al, Kwak et al, and Saita et al all teach the sequential fermentation of milk with a nonlactose-fermenting yeast culture and mixed culture of lactic acid bacteria (see entire corresponding documents).

The claims appear to differ as to the specific recitation of aerobic and anaerobic conditions.

The conditions are inherent and/or obvious to that of the prior art as mixing (aerobic) and sealed containers (anaerobic) are utilized.

Applicant's arguments filed July 8, 2002 have been fully considered but they are not persuasive.

Applicant argues that the prior art does not teach aerobic step followed by an anaerobic step.

It is not seen how the claimed invention differs from that of the prior art. Applicant claims "treating ... to render a treated medium" where it is not seen how this differs from the teachings of the prior art.

Applicant argues that each of the prior art references specifically states aerobic and anaerobic conditions that differ from that of the claimed invention. Applicant does not provide support for these conclusions. The prior art clearly teaches a sequential fermentation using a non-lactose fermenting yeast culture and a mixed culture of lactic acid bacteria.

Applicant argues that the prior art fails to produce the same aroma as the claimed invention. Applicant does not claim aroma.

All of the claim limitations and arguments have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
